tooth whitening options

At home bleaching

This involves wearing special custom made bleaching trays at night or during the evenings, for a period of 2-4 weeks.

The advantages are that it takes relatively little surgery time and is the least expensive of the tooth whitening techniques.

It is also easy to top up later if you keep the trays; you can do this as and when you please.

Cost: **£450.00**

Deep Bleaching

This is a technique imported from the US. Mr Daly has extensively researched all tooth whitening techniques and this is the only one that guarantees you the whitest teeth possible.

We were the first practices in the UK offering the “**Deep Bleaching**” technique. It now can be combined with laser whitening to speed up the surgery visits dramatically.

Where other methods may have failed, deep bleaching will be successful.

It is more complex as the procedure is carried out over two surgery visits and incorporates home bleaching for two weeks.

Cost: **£750.00**
